Top 10 tips for clean Diesel

01.

Always deal with a reputable authorised distributor or supplier

02.

If possible keep tank and hose out of direct sunlight and shelter from rain.

03.

Fit particle and water filters to the tank outlet.

04.

Replace perished hose and stow off ground.

05.

Clean your tank annually.

06.

Keep fill gun clean and prevent from filling with water

07.

Tilt tank slightly so any contaminant falls away from outlet.

08.

After delivery, allow tank contents to settle before filling machinery.

09.

Ask for a product specification sheet or spec. sheet for diesel required to confirm manufacturer.
